Estimate no.	LUM-EST-0043
Issued	16 Aug 2026
Confidence	± 15%
Prepared by	**Luminary Studio**

ABOUT THIS ESTIMATE

This is a budgetary estimate in Sri Lankan Rupees for a single landing page presenting Ecomech Engineering Lanka's identity, MEP capabilities and completed projects, with an enquiry form, built to stand up to scrutiny from hotel tender panels. Figures are ranges based on the scope discussed, and now include a small contingency for minor requests raised after development. A fixed itemised quotation follows once the discovery questionnaire is returned.

#	WORKSTREAM	EFFORT	ESTIMATED RANGE
01	**UX & design** Page structure, wireframe and full visual design of one landing page: capability sections, project showcase and enquiry form layout, desktop and mobile, colour and typography aligned to your existing identity.	3–5 d	5,000–10,000
02	**Development** Build of the designed page in Next.js/React with working enquiry form to your inbox, project gallery, on-page SEO and metadata, performance tuning, and deployment to live hosting with SSL.	1–2 wk	30,000–40,000
03	**Post-development contingency** A held allowance for small feature requests or content adjustments raised after the development phase, drawn on only if used and itemised if it is.	0–1 d	1,000–3,000

Low estimate	LKR 36,000
High estimate	LKR 53,000
Likely total	**~LKR 44,500**

Single landing page, contingency included · Not a final bill

HOW COST SCALES WITH PAGE COUNT

1 page (this estimate) · Single landing page covering company, MEP capabilities, projects and enquiry form, contingency included	36,000–53,000
2–3 pages · For example separate Services and Projects pages, added per additional page	+5,000–7,000 / page
4–6 pages · Each page beyond the third, for example About, Sectors, Careers, Contact	+3,000–5,000 / page
7+ pages · Larger structured site with project database, downloadable capability statements and similar	Custom quote

Per-page figures cover both design and development of a page reusing the established layout system. The three prototype concepts are a one-time design-direction exploration delivered with the primary landing page, and later pages reuse that direction. Pages needing new layouts or bespoke functionality are quoted separately, and pages added after signing are charged on the page base rate with a phase multiplier: Design x1.0, Development x1.4, late development or pre-launch x1.8.

HOW PAYMENT & CHANGES WORK

- ✓ Payment is staged 30/70: 30% on design approval (development begins; this also covers the discovery and 3 prototype concepts delivered in the design stage), 70% on delivery before final handover.
- ✓ Design delivers 3 prototype concepts; you pick 1, then we run up to 2 revision rounds on it. Refinements to the approved design during development are included.
- ✓ New pages, features or changes requested after delivery are billable, quoted first as a written change order, and invoiced once the change is completed; approved change orders may adjust the timeline.
- ✓ Aftercare: the first 5 change requests are free, then LKR 6,000 per change request. Additional requirements are quoted per item, or LKR 20,000 per working day.
- ✓ A 30-day post-launch warranty covers defects at no charge (new features excluded); ongoing hosting and care is available as a monthly plan.
- ✓ Intellectual property transfers to you on full payment. Once the SOW is signed the price is fixed unless you request additional pages or requirements.

WHAT COULD CHANGE IT

The estimate assumes you supply company text, project details and usable photographs of completed installations. Costs move upward if we write or restructure the copy, retouch or source site photography, build a filterable project database, add multilingual content, or if the enquiry form needs to feed a CRM, generate PDF capability statements, or handle document downloads for tender panels. The contingency covers only minor post-development adjustments. Anything beyond the agreed scope is quoted as a written change order before we build it.

NEXT STEP

Complete the short discovery questionnaire, including the industry questions below, and we will convert this into a fixed, itemised quotation with a delivery schedule. There is no upfront payment: after you approve one of the three design concepts we invoice 30%, with the remaining 70% due on delivery before final handover. Up to two revision rounds on the selected concept are included at design stage, refinements to the approved design during development are included, a 30-day defect warranty follows launch, and aftercare covers your first 5 change requests free, then LKR 6,000 per change request.
